01 Security

Keeping your bike safe is really a matter of common sense, but here are a few tips that will help.

- Always lock your bike
- Lock the frame not just the wheels
- Lock to a fixed immovable object
- Keep the lock off the ground so a hammer cant be used
- Get the best lock(s) you can afford
- Choose a busy place with lots of people
- Lock your bike in a well lit place
- Do some research online on the best way to lock your bike

04 Chains

TAYA has developed a range of chains specifically designed to deal with the greater torque and stress an eBike delivers to the drivetrain. All current safety standards have been matched, plus the TAYA-DHT (Diamond Hard Treatment) means the chain also has up to HK 2,000 hardness, prolonging the life of the chain.

The eBike range has shown flawless compatibility with the Bosch series (350W, 75Nm), Yamaha series (500W, 80Nm) as well as other leading eBike systems and the superior strength of the chains means they are approved for 1000W and 160Nm torque mid-drive systems.
